Quality Policy

The organisation ALMIT Group (incorporating Specialist Coatings and ALMIT Metal Finishing) proposes through its systems and people to provide total commitment to customer service by establishing, maintaining and implementing a Quality Management System (QMS) in line with the requirements of the standard BS EN ISO 9001:2015 (Quality management systems).

The Directors are committed to meet the company's obligations with respect to current and future legislation and customer requirements. To do so approvals from Qualicoat, Alestia AP, Interpon D, Syntha Pulvin, Tiger, Wellstream, FMC (Global), One Subsea, Siemens and Komatsu are maintained and will also influence the QMS.

In order to continually improve the organisation performance, the QMS is monitored and evaluated for its applicability and effectiveness. Quality objectives are established and risks and opportunities are identified through internal auditing, management review and review of performance trends.

The Directors recognise that in order to achieve their goals the active involvement, participation and commitment of all employees is essential. Therefore, the organisation fully supports the development of all its employees and shall continually identify and ultimately meet training needs required to enable employees to perform their duties effectively, efficiently and competently.

Mr. A. D. Mitchell
Director
